

MANAGED AZURE VIRTUAL DESKTOP

sepago. making people love it.

We make more out of less: lowered costs, increased flexibility

Whether you want to enable **device-independent mobile working** and/or bring your own device (BYOD) for your employees, or respond agilely to market requirements and **growth**, the **Managed Azure Virtual Desktop (AVD) solution** offers secure workstations as Desktop as a Service (DaaS) with full cost control.

With our specialists from our Managed Services team, we will ensure the maintenance, operation and support of your AVD environment at defined service times. Our self-developed automation, monitoring and analysis products guarantee persistent systems that are always up to date and enable simple and highly flexible scaling.

After the initial setup, Managed Azure Virtual Desktop is **"ready to use"**!

Azure Virtual Desktop incl. Consumption and Managed Services
Net price per user* per month from €29.50

*Our Managed AVD offer is designed for concurrent users who, while maintaining very high security requirements, also use specialist applications in addition to standard applications, without having to make special demands on their hardware or on performance on the road.

The perfect combination: The Cloud Desktop from Microsoft plus professional management by sepago. Over twenty years of experience with virtual desktops have given us the expertise to create best practices and products.
