

CLOUD DESKTOP STRATEGY WORKSHOP

sepago. making people love it.

Getting lost in the jungle of cloud desktop solutions? Our Cloud Desktop Strategy Workshop format enables our customers to develop a future-proof cloud-based end-user computing strategy. At sepago, our IT architects strive to ensure a work environment that will heavily benefit our customers end-users. Our roadmap, best practices and blueprints define the success criteria for a single centralized cloud desktop strategy that fits our customer's needs.

Within this workshop, we outline the different cloud-based and hybrid implementation options that we offer as an experienced multi-technology partner. With a focus on Microsoft and Citrix solutions, we optimize and enrich the strategy with products from our partners to build a perfect landscape. Together with our customers, we determine the needs and the relevant usage scenarios, based on IT decision makers as well as end-user perspectives. After the workshop our customers not only have a unique roadmap to their individual cloud-based future, but also a partnership to achieve said future.

Our workshop consists of four sessions, this is what to expect from the first!

The perfect combination: Two decades of sepago expertise in end-user computing delivered in one workshop package. IT enables our customers to master latest challenges in fast developing VDI landscape.

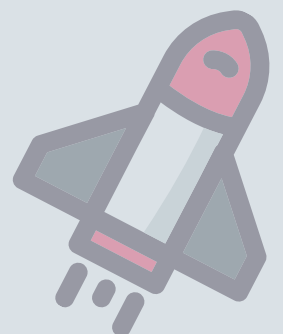

"The condensed sepago experience and expertise in end-user computing in one workshop format. A technology deep dive in the shortest possible time."
